VR-50

Our new efficient cleaner for smaller reservoirs

In these days the importance of saving water is steadily increasing. Traditional cleaning of all types of reservoirs has required draining with staff inside the reservoirs. This is no longer accepted on many of the world markets due to the safety risks for the staff. Plus the unnecessary waste of water.

The alternative with divers is becoming less popular due to higher costs as well as the safety issue. Few consumers enjoy the thought of divers in their drinking water.

Weda underwater cleaners makes it possible to clean reservoirs of all kinds and totally avoid human entry. Besides this a lot of water is saved. In many cases processed water.

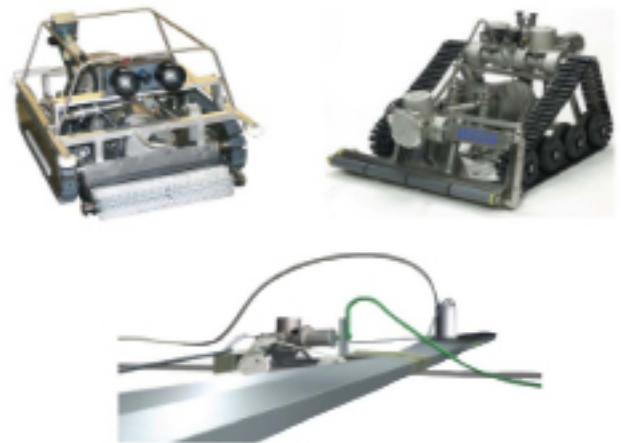

MADE IN SWEDEN

Description

The Weda VR-50 is in many aspects just a smaller version of the VR-600. It is specifically designed for smaller reservoirs and reservoirs where access with our larger cleaner is limited due to smaller man holes, limited space between pillars inside the reservoir etc. The Weda VR-50 is remote controlled and equipped with a fixed mounted camera and lights. The pumping is achieved by a 1,3kW submersible drainage pump with a capacity of up to 600 l/m. The VR-50 runs on 230V 1-phase. No need for three phase connections. This, in connection with the fact that both the cleaner and the power control box can be carried by one operator, makes the VR-50 a very suitable cleaner for a large number of applications. For applications in aggressive waters the aluminium casings can be protected by anodizing and epoxy coating. Typical applications so far has been smaller drinking water reservoirs and smaller industrial tanks of various kinds.

Our business - underwater cleaning technology

WEDA offers a wide range of cleaners for small and large drinking water reservoirs, various types of filters and sedimentation basins. WEDA, formed in 1919, is a Swedish company with headquarters in the town of Södertälje, south of Stockholm. WEDA products are available worldwide through a global network of distributors and Weda subsidiaries in the US and Germany .
